SUMMARY

Gameplay Programmer (Unity C# · Unreal Engine 5 C++) and recent Game Design & Development graduate. Shipped a mobile game on Google Play, built online multiplayer with Netcode for GameObjects and implemented a full Gameplay Ability System in C++ for my Bachelor's Thesis. Looking for my first role on a gameplay or systems programming team.

PROJECTS

- **BipBop — Published Mobile Game · Unity · Team of 2**
 - Built 3 of the 7 minigames solo and co-developed the shop, progression and leaderboards.
 - Integrated PlayFab (online leaderboards), AdMob and IronSource.
 - Published on Google Play; migrated the project from Unity 2022 to Unity 6.
- **GAS Prototype — Bachelor's Thesis · UE5 C++ · Solo**
 - 9 abilities built with the Gameplay Ability System (dash, melee combo, projectile, AOE, shield...).
 - Shared C++ architecture for player and enemies, with no duplicated logic.
 - Centralized damage pipeline (SetByCaller, MMC, shield absorption) and a reactive UMG HUD.
- **The Peak — Best Game Award · Unity · Team of 6**
 - Gameplay programmer: Game, Turn and Spawn managers, death system and climber HUD.
 - Cinemachine camera system; worked on the grid and pathfinding.
- **Kitchen Caos — Online Multiplayer · Unity Netcode**
 - 4-player online co-op with Unity Relay & Lobby.
 - Server-authoritative gameplay using RPCs and NetworkVariables.

EDUCATION

- Bachelor's Degree in Game Design and Development (2022 – 2026)
- Florida Universitària — Valencia, Spain

TECHNICAL SKILLS

- C#, C++, Blueprints
- Unity, Unreal Engine 5
- Gameplay Ability System, UMG, Niagara
- Netcode for GameObjects, Relay & Lobby
- PlayFab, Cinemachine, XR Toolkit (VR)
- Git / GitHub, JetBrains Rider

HIGHLIGHTS

- Best Game Award — The Peak
- Game published on Google Play
- Multiplayer in Unity and Unreal

LANGUAGES

- Spanish (Native)
- English (B2 level · B1 certified)
